Joseph Manto

Cebu, Philippines

PROFESSIONAL SUMMARY

AI video editor and web automation specialist building systems that make businesses run faster. I engineer the first 3 seconds that decide if someone keeps scrolling, and I build the automation that makes the whole operation smoother. From AI video production to production websites to automated workflows, I take a brief and turn it into something that works.

CORE COMPETENCIES

AI Video Production | Hook-Rate Engineering | Python Scripting | OpenCode / Claude Code | Web Development | GSAP Animations | Vercel Deployment | Workflow Automation | Content Operations | Social Media Strategy

WORK EXPERIENCE

Six God Crow

2023 — Present

Founder & Operator

- Built and deployed 13+ production websites for financial advisors, law firms, restaurants, and service businesses using HTML/CSS/JS, GSAP animations, and Vercel
- Engineer AI video ad sets: 3–5 variants per day from one brief, 5 polished UGC ads weekly, with hook-rate focus on first 3 seconds
- Build Python scripts and AI-powered workflows that turn hours of manual work into systems that run themselves
- Manage content operations, social media accounts, and creator relationships across multiple platforms

AI Video Production

2023 — Present

Freelance AI Video Editor

- Produce AI-generated video ads using Higgsfield, Elevenlabs, Runway, CapCut, Midjourney, Leonardo AI, and Stable Diffusion
- Color grade AI-generated and real footage together so the seams disappear — blend modes, masking, lighting matching
- Use Monday.com to auto-organize creatives by hook type, retention graph, and winning variant
- Deliver on schedule with God mode availability: 16-hour days, 7 days/week when needed

SELECTED PROJECTS

13+ Production Websites

Full-stack web builds for businesses including Dr. Wayne Lee (medspa), MouradNYC (restaurant), Armstrong Dixon ($447M+ AUM), Adams Wealth Partners ($1.85B+ AUM), Kinnard Law, DRS Law ($500M+ recovered), and CBK Wealth (Ameriprise). Each site built as a conversion tool with scroll animations, mobile-first design, and deployed to Vercel.

HTML · CSS · JavaScript · GSAP · ScrollTrigger · Vercel

AI Workflow Automation

Built automated systems for content operations, client onboarding, and team coordination using OpenCode and Claude Code. Created scripts that handle batch processing, data extraction, and report generation — turning hours of manual work into pipelines that run without intervention.

Python · OpenCode · Claude Code · Automation

SKILLS

Video & AI: Higgsfield, Elevenlabs, CapCut, Runway, Midjourney, Leonardo AI, Stable Diffusion

Web & Code: HTML, CSS, JavaScript, Python, GSAP, Vercel, Git **Automation:** OpenCode, Claude Code, Monday.com, Canva, GoHighLevel, Zapier
